

Can I have an email account for a subdomain?

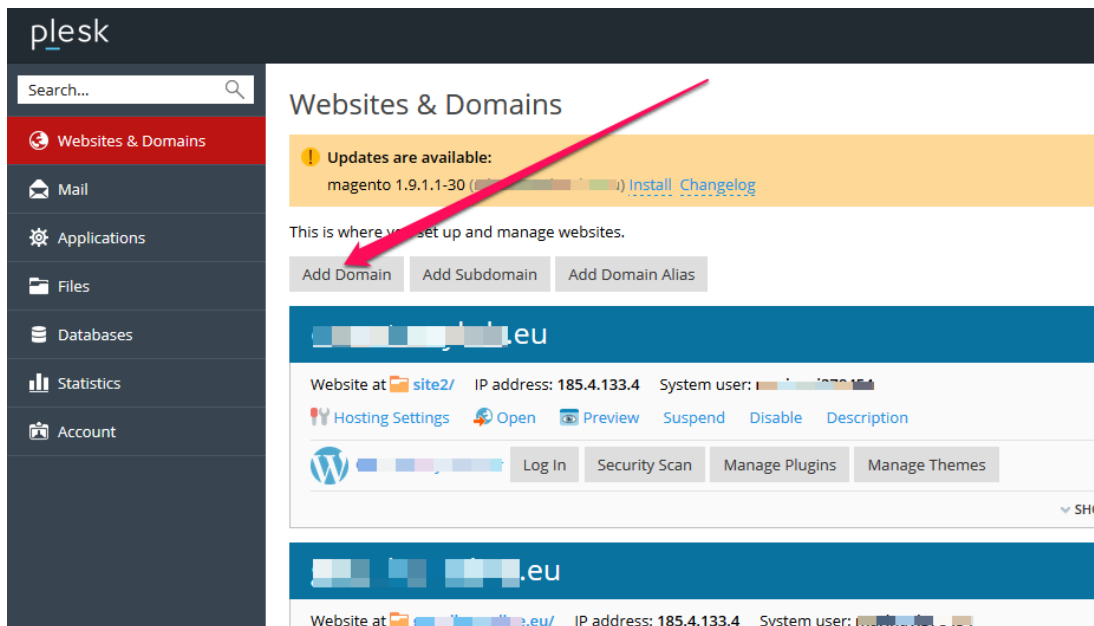

- 2021-07-15 - Email

In case you want to create email accounts for your subdomains, you can add them to your plesk as a domain and then create your email accounts, following the instructions described below:

1. Log into [myTophost Panel](#) and then click on **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. In the tab **Websites & Domains**, click on **Add domain**.

3. In the blank field (1) enter the desired subdomain, leave all the settings on default and click on (2) **OK**.

Adding New Domain Name

Domain name * 1

The website's Internet address, such as example.com.

Location of the website's files *

Hosting type

☒ Activate the DNS service

☒ Activate the mail service

Hosting Settings

Document root *

The path to the website home directory.

Preferred domain * ☐ www.subdomain.123.eu ☐ subdomain.123.eu ☒ None

Select the URL (either with or without the www. prefix) to which site visitors will be redirected via a SEO-safe HTTP 301 redirect.

Your Files to Copy to Hosting

☐ Enable Git support

If you leave Git support disabled, the root directories (website/application root and document root) will be created empty, and the site will display the default page in the browser. You will need to upload the files of your site to the document root using FTP or File Manager. Alternatively, enable Git now or later (in Websites & Domains) and upload files from a Git repository.

Secure with an SSL/TLS Certificate

☐ Secure the domain with Let's Encrypt

Let's Encrypt is a certificate authority (CA) that allows you to create a free SSL/TLS certificate for your domain. The certificate will be renewed automatically every month. By clicking the "OK" button you acknowledge that you have read and agree to the [Let's Encrypt Terms of Service](#).

* Required fields 2

4. In the **Email** tab, click on **Create Email Address**.

5. On the next tab (**Create Email Address**) enter the following:

- The name of the email account (e.g. info) and select your subdomain from the drop down menu.
- The password that you want for your email account (it must contain symbols, letters and numbers) (2).
- Confirm the code by entering it a second time (3).
- Click on **OK** (4).

Create Email Address

[General](#) [Forwarding](#) [Email Aliases](#) [Auto-Reply](#) [Spam Filter](#)

If this email account is associated with an auxiliary user (Access to the Customer Panel is enabled), the changes you make on this page affect this user as well.

Email address * **1** @ ☒ Access to the Customer Panel (username: info@example.com)Password **2** Strong (?)

This password will be used for accessing the mailbox and for logging in to Plesk if the address is associated with an auxiliary user.

[Generate](#) [Show](#)Confirm password **3** ☒ Mailbox☒ Default size (200 MB)☐ Another size MB

The mailbox size cannot exceed the default size.

The maximum number of outgoing email messages

☒ Default☐ Custom value for the mailbox messages ☐ Unlimited

Description in Plesk

The description is visible to everyone who has access to this email account.
