Top.Host HELP
EXTREME SUPPORT

Can I use the SSH on my account?

- 2021-07-14 - *Άλλες*

If you have a shared hosting plan and you wish to activate the **SSH service**, contact our technical support team, mentioning the commands that you want to enable.

The activation process must be done manually since there are no full management rights for security purposes. The commands that can instantly be enabled are the following:

bash / cat / chmod / cp / curl / du / false / grep / groups / gunzip / gzip / head / id / less / ln / ls / mkdir / more / mv / pwd / rm / rmdir / scp / sh / tail / tar / touch / true / unzip / vi / wget / zip
