Πώς μπορώ να απενεργοποιήσω την Dns υπηρεσία μέσα από το Plesk;

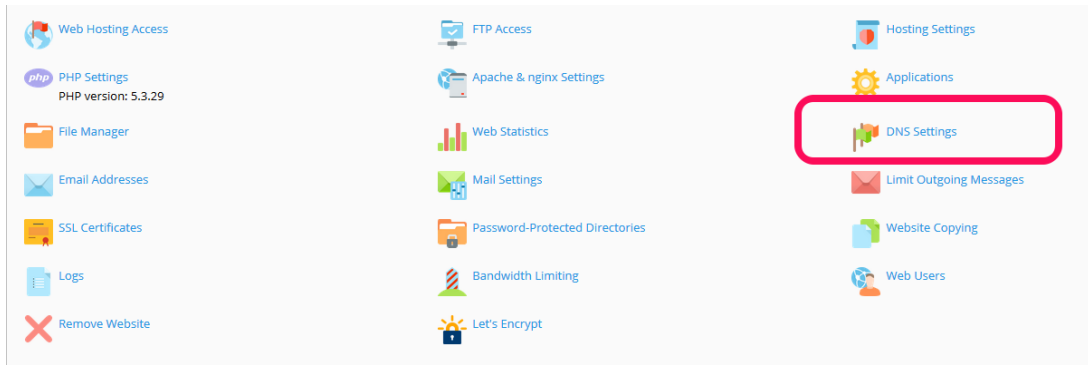

- 2020-02-07 - DNS

When a domain is created in Plesk, DNS records are automatically generated and you might not want them if you use your own server. Plesk allows you to disable your DNS service through the DNS Settings. In order to do this, follow the steps described below:

1. Log into [myTophost Panel](#) and then click on **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. In the **Websites & Domains** tab, click on **DNS Settings**.

3. Click on **Disable**.

Websites & Domains

The Plesk's DNS server acts as a primary name server for the DNS zone [yourdomain.gr](#) ...
