## I bought a domain name. When will it be activated and how do I manage it?

- 2023-02-08 - Κατοχύρωση / Ανανέωση

The domain name is instantly registered as long as you purchase it by credit card or PayPal. If you choose to make a deposit, the domain name won't be registered right after your order submission, but only once the payment is confirmed by our accounting department.

Once the domain is activated, you will receive the access passwords, and you will have the possibility to manage it through [myTophost Panel](#). Your domain will be available online within 48 hours from the moment that you update it with your hosting nameservers.
