

How can I change the access information of my FTP service in Plesk Onyx?

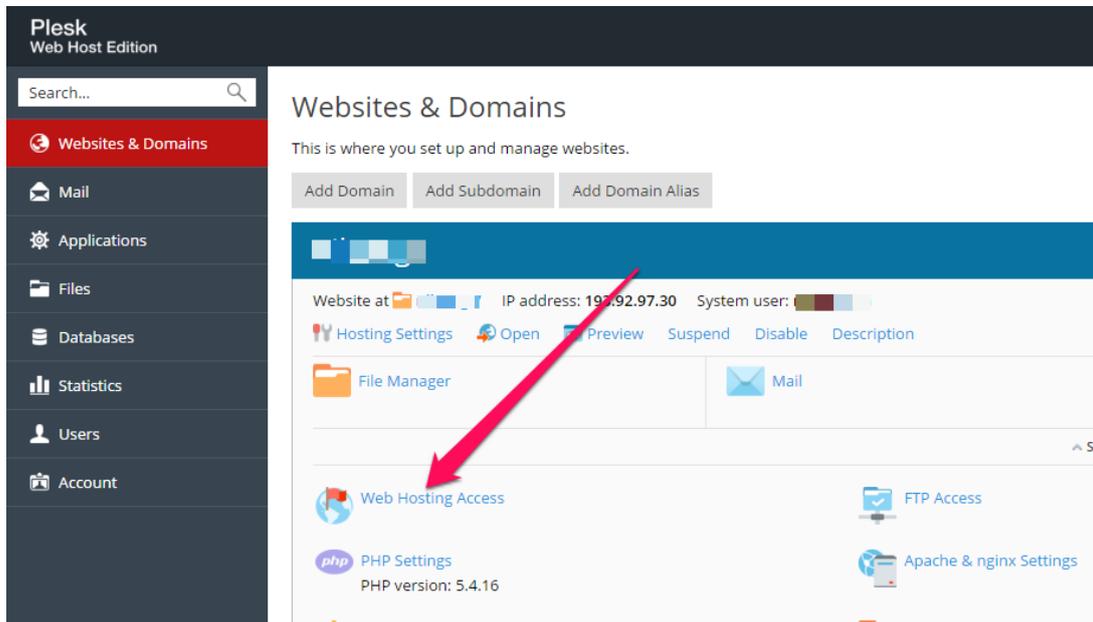

- 2020-02-12 - FTP/ File Manager

In order to change the information of your **FTP service** in Plesk, take the following steps:

1. Log into [myTophost Panel](#) and select **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. In the tab **Websites & Domains**, click on Web Hosting Access.

3. In the fields **Password** and **Confirm password** enter the new password and click on **OK**.

IP Addresses 193.92.97.30

System user

Here you can specify an operating system user for managing files and folders within the subscription by FTP or with File Manager. The system user is

Username *

Password

Confirm password

Access to the server over SSH

Access to the server over SSH with system user's credentials.

Websites to which these settings apply

The following websites are associated with the current system user. The changes in web hosting access settings you make on this page will apply to all

* Required fields

Note: The password must consist of numbers, symbols and letters.
