

What does web hosting mean and why do I need it?

- 2023-01-05 - Hosting

In order for a website to be accessible for web users, it must be hosted by a server which is connected to the internet at any time. Processing power, access speed, network up time are just some of the factors a customer must consider when choosing a hosting service.

If you wish to have an online presence for personal or professional purposes, then a web hosting by a reliable Server that runs 24/7/365, will guarantee your company the online presence that you want while granting you a significant advantage.
