## How can I change my DNS service from Slave to Master through Plesk?

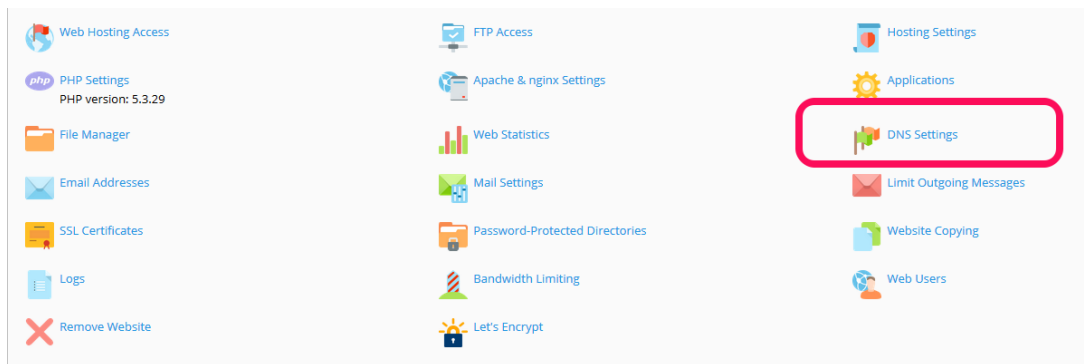

- 2021-08-10 - DNS

In case you are hosting your sites in Plesk and have an independent DNS server that acts as a main server (Master), you have the possibility to have Plesk act as a secondary server (Slave). In order to switch the two servers, follow the instructions described below:

1. Log into [myTophost Panel](#) and click on **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. In the **Websites & Domains** tab, click on **DNS Settings**.

In order for Plesk to become your main server:

1. Click on **Master/Slave**.

The Plesk's DNS server acts as a primary name server for the DNS zone [yourdomain.gr](#) ...

✓ **Information:** This DNS server now acts as a master name server for the zone [yourdomain.gr](#).
