How can I change my main domain to one that already exists in Plesk?

- 2023-02-01 - Διαχείριση

In case you want to rename your main domain name to another one that already exists in Plesk, follow the instructions described below:

1. Log into <u>myTophost Panel</u> and click on **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

In order to rename your main domain, follow the instructions described here.

4. Transfer files to the correct folders either through <u>FTP</u>, or through <u>Plesk's file manager</u>.

5. In case you have subdomains, domain alias and email accounts, you will have to recreate them in Plesk. Follow the instructions described below:

- Creating a Subdomain
- Creating a domain alias
- Creating email accounts

6. In this step, you must make sure that everything is working properly.

7. Delete the domain that you renamed in the 2nd step. In order to delete the renamed domain through Plesk and more specifically by selecting **Remove website** from the

Websites & Domains tab, follow the instructions described here.
