How can I change the password of my email account in plesk Onyx?

- 2021-08-02 - Email

In order to change the **password** for your email account in Plesk, take the following steps:

1. Log into [myTophost Panel](#) and select **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. In the tab **Mail**, select the email account.

The screenshot shows the Plesk Web Host Edition interface. The left sidebar contains navigation options: Websites & Domains, Mail (highlighted in red), Applications, Files, Databases, Statistics, Users, and Account. The main content area is titled 'Mail' and has four sub-tabs: Email Addresses (selected), Mail Settings, Mailing Lists, and Outgoing Mail Control. Below the sub-tabs, there is a description: 'Create and manage email accounts associated with your domains. For each email account, you can set up a mail addresses. You can also set up protection from spam and viruses, if these services are available for your account'. There are four action buttons: 'Create Email Address', 'Refresh Usage Stats', 'Limit Outgoing Messages', and 'Remove'. Below the buttons, it says '2 items total'. A table lists email addresses with checkboxes and a 'User' column. The first row is partially visible: 'Email address ^' and 'User'. The second row is 'info@' and 'top@t'. A red arrow points to the first row.

3. In the fields **password** and **confirm password**, enter your new password and click on **OK**.

info@

General Forwarding Email Aliases Auto-Reply

If this email account is associated with an auxiliary user (Access to the Customer Panel is enabled), the changes you make on this page changed to the new values as well.

Email address * info@

Access to the Customer Panel (username: info@)

Password 

This password will be used for accessing the mailbox and for logging in to Plesk if the address is associated with an auxiliary user.
