How can I change the password of my email account in plesk Onyx?

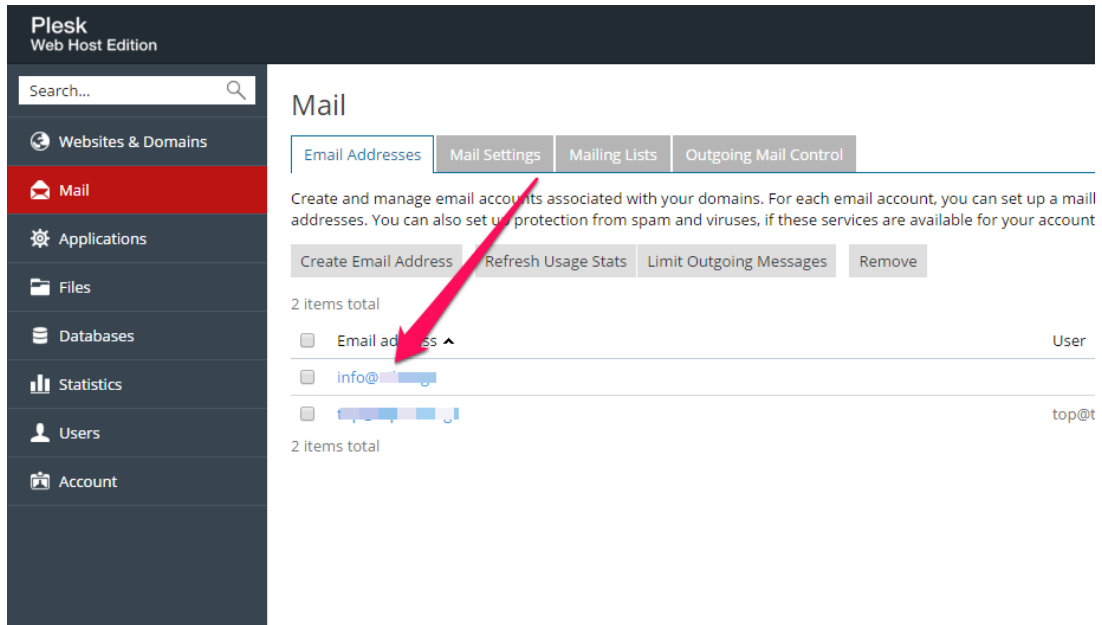

- 2021-08-02 - Email

In order to change the **password** for your email account in Plesk, take the following steps:

1. Log into [myTophost Panel](#) and select **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. In the tab **Mail**, select the email account.

The screenshot shows the Plesk Web Host Edition interface. The left sidebar has the 'Mail' tab selected. The main content area is titled 'Mail' and has sub-tabs for 'Email Addresses', 'Mail Settings', 'Mailing Lists', and 'Outgoing Mail Control'. Below the sub-tabs, there is a description: 'Create and manage email accounts associated with your domains. For each email account, you can set up a mail address. You can also set up protection from spam and viruses, if these services are available for your account'. There are four buttons: 'Create Email Address', 'Refresh Usage Stats', 'Limit Outgoing Messages', and 'Remove'. Below the buttons, it says '2 items total'. A table lists two email addresses:

<input type="checkbox"/>	Email address ^	User
<input type="checkbox"/>	info@	
<input type="checkbox"/>		top@t

Below the table, it says '2 items total'. A red arrow points to the first email address entry in the table.

3. In the fields **password** and **confirm password**, enter your new password and click on **OK**.

info@

General Forwarding Email Aliases Auto-Reply

If this email account is associated with an auxiliary user (Access to the Customer Panel is enabled), the changes you make on this page changed to the new values as well.

Email address * info@

Access to the Customer Panel (username: info@)

Password 

This password will be used for accessing the mailbox and for logging in to Plesk if the address is associated with an auxiliary user.
