

How can I change the PHP version in Plesk?

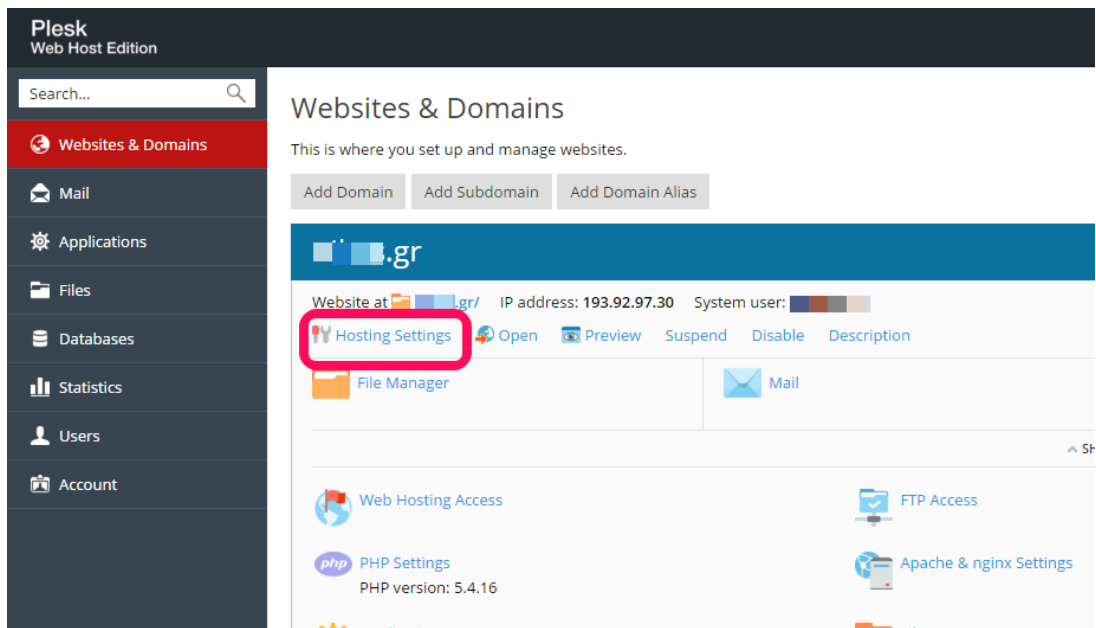

- 2021-08-09 - Άλλες

If you wish to change the PHP version, take the following steps:

1. Log into [myTophost Panel](#) and click on **Plesk Login** to connect to the plesk of the plan that you are interested in.

2. In the tab **Websites & Domains**, click on **Hosting Settings**.

3. From the drop down menu, in the field **PHP Support**, select the PHP version that you want, click on **Apply** and **OK**.
