

How can I connect a hosting plan to a domain name?

Lila TEST - 2019-10-21 - Διαχείριση

In order to connect the hosting plan that you purchased from Top.Host to your domain name, you need to follow the 5 steps below:

1. Log into [myTophost Panel](#).

2. In **My services** you can see that the hosting plan has automatically been connected to a temporary address. Click on the button **Manage** to proceed with the setting.

Shared Hosting							BUY NEW PLAN
Pack Id	Package	Services	Status	Expiration date	Plesk Login		Manage
179564	Linux Planet 130656855.linuxzone90.grserver.gr		On	12/12/2019	Plesk Login	Renew	Manage

3. Click **Administer Domain** in the **Domain Name** box.

Domain Name

Define the domain name to be used as the central domain of the Linux Planet plan.

Administer Domain

4. Insert the domain name that you wish to connect to your hosting plan and click **Update**. With this procedure, the domain name is automatically added in Plesk.

 > [My services](#) > [Manage package](#) > [Administer Domain](#)

Administer Domain Linux Planet

Domain Name: 130656855.linuxzone90.grserver.gr

Here you may administer the main domain for your **Linux Planet** plan. To replace the domain already being used, insert the new domain in the according field and click the "**Update**" button.

Note:
After the connection, Top.Host's automated backup service will start taking backups for the new domain. Please, before proceeding, download any available backups locally on your computer [myTophost Backup manual](#).

Connected Domain: www. 130656855.linuxzone90.grserver.gr

New Domain: www.

Update

5. In order to complete the procedure and for the domain name to load your site from the hosting plan, you need to update the nameservers of the domain name. In order for the ISPs to be updated with the new nameservers, there might be needed up to 48 hours.
