How can I create my own nameservers through myTophost Panel?

- 2023-02-10 - Γενικά

In case you want to create your own nameservers, where your domain will appear (e.g. ns1.mydomain.com)

1. Go to myTophost Panel and enter the administration email and your password. Use the reminder link, if you forgot your password.

2. Click on **Manage** on the right-hand side of the domain name.

3. Click on **Create Nameservers**.

4. Then create the nameserver and click on **Save**.

NOTE: You can find the IP in the web hosting activation email with the subject **Web Hosting :: Managing Information** which you received when purchasing your plan and it is the IP of the Primary nameserver

Nameservers	
Primary Name Server	ns141.grserver.gr
Primary NS IP Address	88.99.26.7
Secondary Name Server	ns142.grserver.gr
Secondary NS IP Address	88.99.26.60

If you lost the email, you can ask for it to be re-sent through myTophost Panel.

The ISPs to be informed about the registration of the new nameservers within 48 hours (propagation).
