3. In **status**, click on **Change**, on the right-hand side of **Active**.

Websites & Domains	
Hosting Settings fo	r him ti bait dai 1 k
This is where you configure website	e hosting settings and select the featurer available for your site.
Domain name *	
	The website's domain proce like example.com.
Hosting type	Website [Chante
Website status	Active [Change]

4. Select the **Suspended** option, click on **Apply** and **OK**. This way, your site will be inactive, but your email service will remain active.

Websites & Domains Change Website S	Hosting Settings			
Website status	O Disabled (formely known as Suspended) The website will no longer be hosted on the server and will be unavailable except by FTP clients and File Manager. Visitors will see the web server's default page. The mail service will be unavailable.			
	O Suspended Visitors will be redirected with the search engine-friendly 503 HTTP code to the custom error document page, although the website will remain hosted on the server. The mail service will remain available.			
	Active The website will operate as usual.
