

How can I enable my DNS service through Plesk?

- 2021-08-10 - DNS

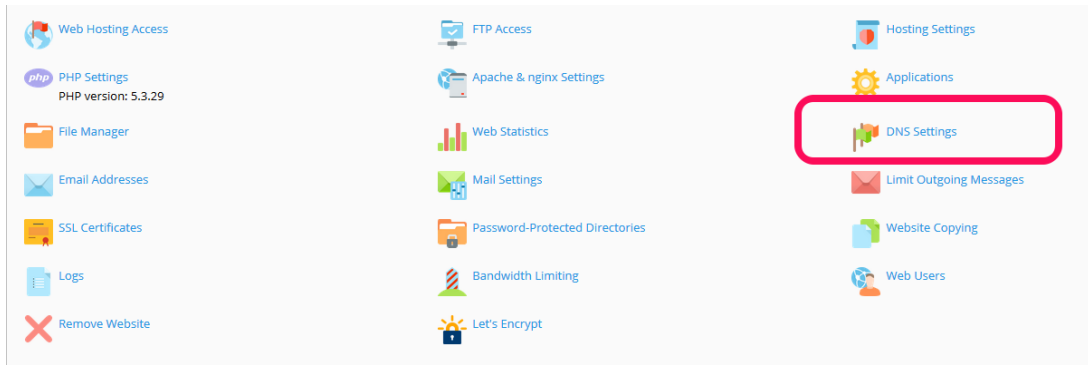

When a domain is created in Plesk, the DNS records are automatically generated and you might not want them because you are using your own server. [If you disable the DNS service](#), Plesk gives you the possibility to re-activate it through the DNS Settings. In order to do that, follow the steps described below:

1. Log into [myTophost Panel](#) and click on **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

The image shows two screenshots from the myTophost Panel. The top screenshot is the login page with the title "Είσοδος στο myTophost Panel" and fields for Email and Password. The bottom screenshot shows the "Πακέτα Υπηρεσιών" (Service Packages) table. The "Plesk Login" button in the table is highlighted with a red circle.

Pack Id	Πακέτο	Υπηρεσίες	Κατάσταση	Ημερ. Λήξης	Plesk Login	Διαχείριση
128583	Linux Starter		Ενεργό	11/08/2017	Plesk Login	Ανανέωση / Διαχείριση

2. In the **Websites & Domains** tab, click on **DNS Settings**.

3. Click on **Enable**.
