How can I enable my DNS service through Plesk?

- 2021-08-10 - DNS

When a domain is created in Plesk, the DNS records are automatically generated and you might not want them because you are using your own server. <u>If you disable the DNS</u> <u>service</u>, Plesk gives you the possibility to re-activate it through the DNS Settings. In order to do that, follow the steps described below:

1. Log into <u>myTophost Panel</u> and click on **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.
