# How can I manage my DNS service through Plesk Onyx?

- 2021-08-10 - DNS

Through your DNS service, you have the possibility to manage your account records in Plesk. You can add, remove or edit the records involving your hosting. Follow the steps described below to manage the records:

1. Log into myTophost Panel and click on **Plesk Login** to connect to the Plesk of the plan that you are interested in.

2. Click on **DNS Settings**.

3. On the next page, you can add, delete and edit a DNS record.

Host	Record type	Value
yourdomain.gr.	MX (10)	mail.yourdomain.gr.
webmail.yourdomain.gr.	A	185.4.133.4
yourdomain.gr.	A	185.4.133.4
mail.yourdomain.gr.	A	185.4.133.4
ftp.yourdomain.gr.	CNAME	yourdomain.gr.
yourdomain.gr.	NS	ns62.grserver.gr.
yourdomain.gr.	NS	ns61.grserver.gr.
yourdomain.gr.	TXT	v=spf1 +a +mx -all
www.yourdomain.gr.	CNAME	yourdomain.gr.
