I have a site on Plesk. How can I redirect it elsewhere?

- 2021-08-23 - [Άλλες](#)

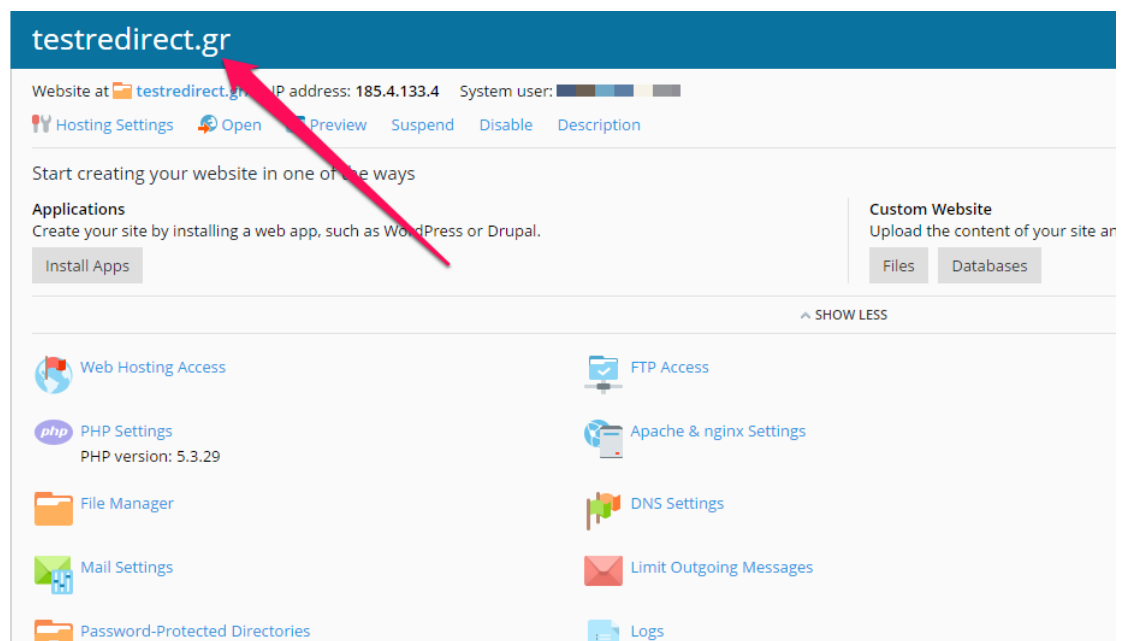

If you **want to redirect your website elsewhere using Plesk**, take the following steps:

If your website is already in Plesk and you wish to redirect it elsewhere

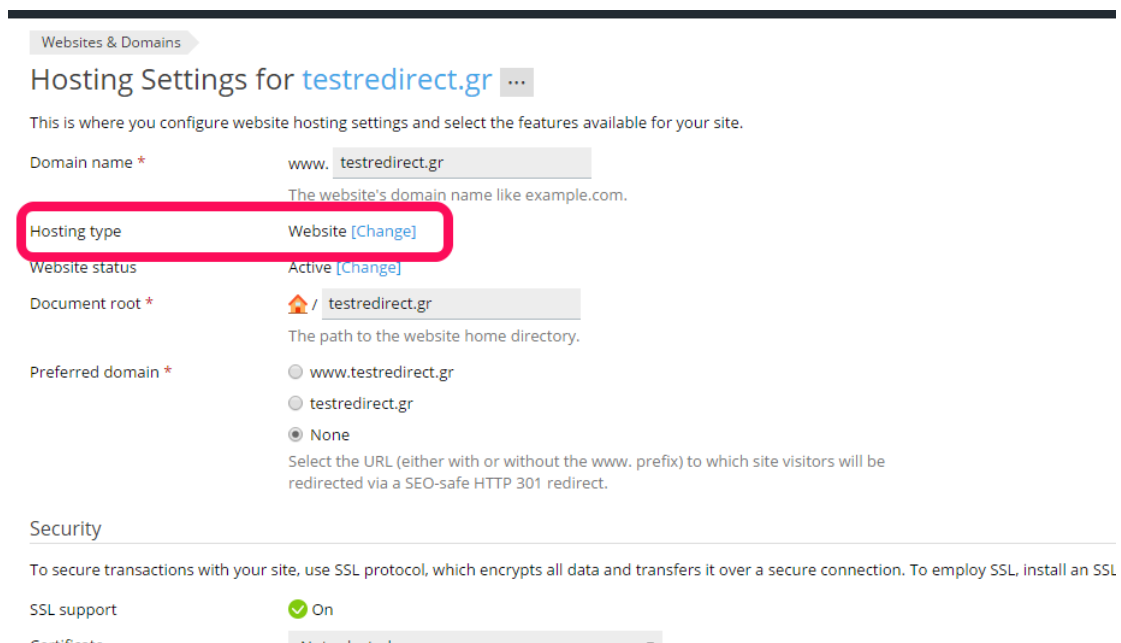

1. Log into [myTophost Panel](#) and then select **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. Select the website that you wish to redirect and click on **Hosting Settings**.

3. In **Hosting Type**, on the right-hand side from **website**, click on **Change**.

4. In **Hosting Type**, select **Forwarding** from the **Drop Down Menu**.

Document root *

 / testredirect.gr

The path to the website home directory.

Preferred domain *

☐ www.testredirect.gr

☐ testredirect.gr

☒ None

Select the URL (either with or without the www. prefix) to which site visitors will be redirected via a SEO-safe HTTP 301 redirect.

* Required fields

OK

Apply

Cancel

5. In **Destination address** enter the website that you wish to redirect your website to and select one of the three options.

Destination address *

destination.gr

URL of the target website.

Forwarding type

☒ Moved permanently (code 301)

Redirect website visitors to another site and show them the destination address. Such redirection will keep the site's search engine rankings.

☐ Moved temporarily (code 302)

Redirect website visitors to a temporary site copy when you do not want search engines to index this temporary site.

☐ Frame forwarding

Redirect website visitors to another site, but do not show them the destination address, so they do not know about the redirection.

* Required fields

OK

Apply

Cancel

Moved permanently (code 301) - If you choose this method your website visitors will be redirected to the site that you have selected without affecting its ranking in search engines.

Moved temporarily (code 302) - If you choose this method, your visitors will be redirected to a temporary copy of your webpage when you don't want search engines to find your temporary website.

Frame forwarding - If you choose this method, you're redirecting your visitors to the website that you have chosen without the final destination being visible.

Click on **Apply** and **OK**.

Note: The website that you are redirecting, must have the same nameservers than the ones of the final destination site.
