

I have a site on Plesk. How can I redirect it elsewhere?

- 2021-08-23 - Άλλες

If you **want to redirect your website elsewhere using Plesk**, take the following steps:

If your website is already in Plesk and you wish to redirect it elsewhere

1. Log into [myTophost Panel](#) and then select **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

Pack Id	Πακέτο	Υπηρεσίες	Κατάσταση	Ημέρα Λήξης	Plesk Login	Διαχείριση
128563	Linux Starter		Ενεργό	11/08/2017	Plesk Login	Ananewsh Διαχείριση

2. Select the website that you wish to redirect and click on **Hosting Settings**.

3. In **Hosting Type**, on the right-hand side from **website**, click on **Change**.

Websites & Domains

Hosting Settings for testredirect.gr ...

This is where you configure website hosting settings and select the features available for your site.

Domain name *
The website's domain name like example.com.

Hosting type

Website status

Document root *
The path to the website home directory.

Preferred domain *
 www.testredirect.gr
 testredirect.gr
 None
Select the URL (either with or without the www. prefix) to which site visitors will be redirected via a SEO-safe HTTP 301 redirect.

Security

To secure transactions with your site, use SSL protocol, which encrypts all data and transfers it over a secure connection. To employ SSL, install an SSL

SSL support On

Certificate

4. In **Hosting Type**, select **Forwarding** from the **Drop Down Menu**.

Websites & Domains > testredirect.gr > Hosting Settings

Change Hosting Type

You can choose to host the website on the server (Website hosting), to set up web forwarding to another website (Forwarding), or to use the domain's

Hosting type

Hosting settings

Document root *

Preferred domain *
 www.testredirect.gr
 testredirect.gr
 None
Select the URL (either with or without the www. prefix) to which site visitors will be redirected via a SEO-safe HTTP 301 redirect.

* Required fields

5. In **Destination address** enter the website that you wish to redirect your website to and select one of the three options.

Websites & Domains > testredirect.gr > Hosting Settings

Change Hosting Type

You can choose to host the website on the server (Website hosting), to set up web forwarding to another website (Forwarding), or to use the domain's

Hosting type: Forwarding **1**

Forwarding Settings

Destination address * **2**
URL of the target website.

Forwarding type

- Moved permanently (code 301)**
Redirect website visitors to another site and show them the destination address. Such redirection will keep the site's search engine rankings.
- Moved temporarily (code 302)**
Redirect website visitors to a temporary site copy when you do not want search engines to index this temporary site.
- Frame forwarding**
Redirect website visitors to another site, but do not show them the destination address, so they do not know about the redirection.

* Required fields

Moved permanently (code 301) - If you choose this method your website visitors will be redirected to the site that you have selected without affecting its ranking in search engines.

Moved temporarily (code 302) - If you choose this method, your visitors will be redirected to a temporary copy of your webpage when you don't want search engines to find your temporary website.

Frame forwarding - If you choose this method, you're redirecting your visitors to the website that you have chosen without the final destination being visible.

Click on **Apply** and **OK**.

Note: The website that you are redirecting, must have the same nameservers than the ones of the final destination site.
