

## Incorporating CDN in Drupal

- 2021-08-19 - CDN

In order to complete the activation of your CDN service in WordPress, take the following steps.

1. [Download](#) the last version of CDN module for Drupal.
2. Extract Drupal's module directory.
3. Follow the path: Configuration → CDN Integration.
4. In the Settings tab, enter the following:
  - Status: Enabled
  - Mode: Basic
  - Show statistics for the current page: Disabled
5. Save your settings.
6. In the Basic Mode tab: Enter the CDN Hostname in the field. E.g. cdn.testdomain.gr
7. Click on **Submit**.
