## How can I check if my ISP was updated and now my website is launched by Top.Host?

- 2023-01-10 - Ξεκινώντας

By taking the following steps, you can see if your website and all of your services are being launched by Top.host.

1. Click on **Start** (bottom left on your screen).

2. Type **cmd** in the search bar and press **enter**.

After searching, the window **cmd.exe** which you must select will appear. It will look like this:

4. Type **ping** where the cursor is flickering and leave a space, type your domain name and press **enter**. For example: **ping top.host** >> **enter** (replace top.host with your domain name).
