Managing the service Lock-Registrar

- **2023-01-31** - Διαχείριση

Top.Host's **gTLD** domains with the extensions **.com/.info/.net/.org.com/.info/.net/.org/ .eu /.club / .email /.coffee / .website /.holiday /.estate /.photography** come with **Lock-Registrar**. The service is enabled by default and it is used to protect the extensions from unauthorized actions from any third party, as well as unintentional actions during the following tasks:

- 1. Transferring the domain name to another registrar
- 2. Changing the domain holder's information
- 3. Deleting a domain

In order for someone to transfer a domain to a new registrar, the domain must be unlocked and therefore, the **Lock-Registrar must be disabled**. If you have registered your gTLD domain from Top.Host and you wish to transfer it to another registrar, you can manage the status in myTophost Panel, by taking the following steps:

1. Log into myTophost Panel

	Top.Host	GR   EN	
	Είσοδα myTopho	ος στο ost Panel	
	Email	5	
	Password	-	
	ΑΣΦΑΛΗΣ	ΕΙΣΟΔΟΣ	
Stra Manageria Arran	Υπενθύμιση Password	Δεν έχετε λογαριασμό; Ενγραφείτε τώρα	
Call C			

2. On the main service page, you will see a **lock icon** next to the domain. If it is locked, the service Lock-Registrar is disabled. If it is unlocked, the domain is not covered by the service. In order to manage the service status, click on the button **Manage** of the corresponding domain name. (*cf. image, click to zoom in*)

Domain Names									
Domain Id	<u>Όνομα Χώρου</u>	Υπηρεσίες	Κατάσταση	<u>Ημ/α λήξης</u>		Διαχείριση			
77186	lockeddomain.com ( <u>Nameservers</u> )	G 🛛 📟	Ενεργό	04/02/2015	Ανανέωση	Διαχείριση			
77187	unlockeddomain.com ( <u>Nameservers</u> )	G 🛛 🖉	Ενεργό	04/02/2015	Ανανέωση	Διαχείριση			

3. Find the box with the name **Lock-Registrar**.

a) Once the service is disabled, you will see the option **ON**. If you select **OFF**, the domain is unlocked.

b) Once the service is enabled, you will see the option **OFF**. With this status, the domain can be transferred to another registrar. Select **ON**, to disable Lock-Registrar again.
