

How can I create a plan for my Reseller account?

- 2020-03-16 - Resellers

In case you want to create a plan and connect it to a customer, follow the instructions described below:

1. Log into [myTophost Panel](#) and click on **Plesk Login** in order to connect to the Plesk of the plan that you are interested in.

2. Click on **Service Plans** and **Add a Plan**.

The screenshot shows the Plesk web host edition interface. The left sidebar contains a search bar and a list of navigation items: Home, Hosting Services, Customers, Domains, Subscriptions, Service Plans (highlighted with a red circle), Tools & Utilities, WordPress, Links to Additional Services, ServerShield by CloudFlare, Google Authenticator, My Profile, Profile, Change Password, and Interface Preferences. The main content area is titled 'Home' and features an 'Overview' section with the following data:

Setup date	Feb 22, 2017
Service plan	Default Reseller
Disk space	0 MB used of Unlimited
Traffic	0 MB/month used of Unlimited

Below the overview, there are two summary rows:

All subscriptions	0 total	0 overusing
Service plans	2 total [add new]	

The screenshot shows the Plesk web host edition 'Service Plans' page. The left sidebar is the same as in the previous screenshot, but 'Service Plans' is now selected and highlighted in blue. The main content area is titled 'Service Plans' and includes a description: 'This is where you can manage your hosting plans. Hosting plan is a set of resources and services provided to your host subscribers.' Below the description are four action buttons: 'Add a Plan', 'Clone Plans', 'Add an Add-on', and 'Remove'. A red arrow points to the 'Add a Plan' button. Below the buttons, there are two summary rows:

2 items total	
<input type="checkbox"/> Plan Name	Traffic

<input type="checkbox"/> Default Domain	100 G
<input type="checkbox"/> Presence Builder (add-on)	—

Below these rows, there is another summary row: '2 items total'.

3. Enter the name of the plan and fill in the features that you want to give to your plan and click on **OK**.

Creating Hosting Plan

Service plan name *

- Resources
- RAM, CPU, Disk I/O
- Permissions
- Hosting Parameters
- PHP Settings
- Mail
- DNS
- Performance
- Logs & Statistics
- Applications

Define the resources provided with the plan, and policy on the resource usage.

Overuse policy

- Overuse is not allowed
Disallow overuse of resources. A subscription is automatically suspended if the resource usage exceeds the limit values.
- Overuse of disk space and traffic is allowed
Allow overuse of disk space and traffic. Disallow overuse of other resources.
 - Notify me by email in cases of overuse.
- Overuse is allowed (not recommended)
Allow customers to use more resources than initially provided by the plan.
 - Notify me by email in cases of overuse.

Define the resources provided with the plan.
