I have built my website in Wordpress. Do I need to do something before downloading Let's Encrypt in Plesk?

- 2023-03-01 - Μετά την εγκατάσταση

In some cases, you might need to configure some extra settings on your website so that it opens with https. For example, in **WordPress**, you must carry out two extra steps after having <u>enabled Let's Encrypt</u> in Plesk.

1. htaccess settings:

In Plesk, from the menu on the left, select Files. In your root folder, search the file **.htaccess** and open it, in order to edit it with the following code.

If you cannot find it, create a file with this name and <u>upload it to your root folder</u>. Next, you must enter the following code in the file, wherever this code appears as shown on the following image:

RewriteCond %{HTTPS} off

RewriteRule (.*) https://%{HTTP_HOST}%{REQUEST_URI} [R,L]

Code Editor: 🗾 📄 🖕 / httpdocs / .htaccess					
wp-config.php × .htaccess ×					
1	<pre># BEGIN WordPress <tfmodule mod="" rewrite.c=""></tfmodule></pre>				
3					
4	RewriteCond %{HTTPS} off				
5	RewriteRule (.*) https://%{HTTP_HOST}%{REQUEST_URI} [R,L]				
6					
7	RewriteEngine On				
8	RewriteBase /				
9	RewriteRule ^index\.php\$ - [L]				
10	RewriteCond %{REQUEST_FILENAME} !-f				
11	RewriteCond %{REQUEST_FILENAME} !-d				
12	RewriteRule . /index.php [L]				
13					
14					
15	# END WordPress				

2. Settings in WordPress

Log into the WordPress administrative environment, click on **Settings** and then **General** at the bottom of the menu on the left. You must add an s in the fields **WordPress Address (URL) and Site Address (URL)**, in order to change http into https.

W	MyCMS ↔ 1	🗭 0 🕂 New		
Ð	Dashboard	General Settings		
* 90	Posts Media	Site Title	My CMS	
@ •	Pages Comments	Tagline	Just another WordPress site In a few words, explain what this site is about.	
8 14	Appearance Plugins	WordPress Address (URL)	https://	
≟ بر	Users Tools	Site Address (URL)	https://	to be
Ψt	Settings			

Note: If you download WordPress using Plesk and you wish to activate Let's encrypt, when downloading WordPress, select https instead of http.

Installation of WordPress

Specify the location where this web application should be installed	thtp:// / // // // https secure access to this appli support. Such websites have address application to a directory other than to	cation, install it on a website with SSL es starting with "https". To install the he website root, specify the directory name.		
Update Settings				
Automatically update this app when updates are available	The app will receive automatic updates to newer versions. Warning: Use this option with care because updates can significantly affect the app functionality. For example, app extensions may stop working with another version of the app.			
Administrative access				
Administrative access to the application	Administrative access to the application Use administrative credentials not connected to any particular user These credentials will be used for administrative access to this application. Since they are not associated with any particular user, no shortcuts on My Services page will be created.
