I just purchased a web hosting plan. How fast will my account be activated and when will my website be available online?

- 2023-01-10 - ΞΕΚΙΝΩΝΤΑΣ

If you pay your order by **Credit card, PayPal** or **paysafecard**, it will immediately be automatically activated.

If you pay through your **Bank**, the plan will be activated for 10 days until the payment has been identified.

NOTE: If you have made your deposit through the system DIAS by Piraeus, Eurobank, Ethniki or Alpha Bank, the identification will only take up to **one hour**. If you make your payment through the system DIAS to one of our [associate banks](#), the identification will be carried out by our accounting department from Monday to Friday at 2 pm.

Along with your account activation, you will receive the necessary access and management information for your web hosting plan.

Your website will be available online depending on the following:

1. If you registered your domain name from Top.Host along with your web hosting plan purchase, your website will be available online within 48 hours from the moment you receive the domain registration confirmation.
2. If you registered your domain name before activating the web hosting plan, your website will be available online within 48 hours from the moment you entered the hosting nameservers into your domain. During that 48-hour timespan, you can manage your hosting plan through the temporary URL that you will receive in your web hosting activation email.
