How can I install Let's Encrypt SSL certificate through my Plesk control panel ?

- 2020-03-16 - [SSL / Let's Encrypt](#)

Let's Encrypt SSL Certificate is a Certificate Authority (CA) that enables you to create a free SSL certificate for your domain.

You can install it easily through Plesk by following these steps:

1. [Log in to myTophost Panel](#) and select **Plesk Login** to connect to Plesk of the package you are interested in.

Shared Hosting BUY NEW PLAN						
Pack Id	Package	Status	Expiration date	Plesk Login		Manage Service
	Linux Star	On	09/09/2020	Plesk Login	Renew	Manage Service

2. In **Websites & Domains** tab, choose **SSL/TLS Certificates**.

3. In **Entry-level protection** category, click on **Get it free** button.

4. In the next window,

SSL/TLS Certificate for self-improvement.g

The current SSL/TLS certificate is valid to June 10, 2020. It will be used to secure your website until a new one is issued.

Let's Encrypt is a certificate authority (CA) that allows you to create a free SSL/TLS certificate for your domain. By proceeding you acknowledge that you have read and agree to the [Let's Encrypt Terms of Service](#).
Note: The certificate will be automatically renewed 30 days in advance before its expiration.

Email address *
Make sure to use a valid email address to receive important notifications and warnings.

☒ Secure the wildcard domain (including www and webmail)
*.

☒ Include a "www" subdomain for the domain and each selected alias
www

☒ Secure webmail on this domain
webmail

☒ Assign the certificate to mail domain
IMAP, POP, SMTP on

- Type your email address (may be used in emergency announcements or some key loss to resubmit)
- Check **Secure the wildcard domain (including www and webmail)**, which includes **www.yourdomain.com**, the **webmail** and all the rest **subdomains** of your main domain, in case that they exist. Otherwise, you can choose only the instance you want to be secured:
 - If you want to install SSL for **www.yourdomain.com**, check the box **Include a "www" subdomain for the domain and each selected alias**
 - If you want to install SSL for webmail, check the box **Secure webmail on this domain**.
- Check **Assign the certificate to mail domain**, which includes **IMAP, POP and SMTP service of your domain in case that it is necessary**.
- Select on **Get it Free**

4. In order Let's Encrypt to be activated, a **TXT record** needs to be added in your domain's DNS zone. In case that DNS zone responds from the same server, TXT record is added automatically. Otherwise you need to manually add the corresponding TXT record in your DNS zone. Once TXT record has been added on the DNS zone, click on **Reload** and give some minutes for SSL to be issued.

SSL/TLS Certificate for self-improvement.g

Started issuing a wildcard SSL/TLS certificate from Let's Encrypt for the domain self-improvement.g.

Please wait while Plesk finishes adding a DNS record with the following parameters:

Record type: TXT
Domain name: **_acme-challenge**
Record: **IOPVtLDH4SMWgKRS-onPIEaZO93ZrZ5PjnlWaAwRg**

To terminate and delete the existing certificate request, click "Cancel".

Before clicking "Reload", make sure that the DNS record was added and can be resolved externally.

4. Upon completion of the installation, there is a confirmation message (as shown in the following message) that indicates the SSL is successfully installed on your domain.
